COTTO THE GLOBAL MASTER CATALOG 2015-16

BATHTUB & SHOWER ENCLOSURE
COMPANY PROFILE

COTTO’s mission is to provide The Right Solutions with superb products and responsive service for home comfort and Sanitary Ware. This means products of the highest quality and service of the highest standard to meet any and all consumer needs and to solve any problems that may arise with Tiles and Sanitary Ware.

The Brand COTTO was first introduced in 1984, as part of the Siam Cement Group. On 28 April 2009, a new logo was introduced to encompass ceramic tiles, Sanitary Ware, and faucets for three companies: Thai Ceramic Industry Co., Ltd., manufacturer of floor and wall tiles, introduce the name: COTTO Tiles.

Siam Sanitary Ware Industry Co., Ltd. (SSI) manufactures and distributes a complete line of Sanitary Ware under the brand COTTO, offering an extensive range of models in response to consumer preferences. SSI operates four factories with an annual capacity of up to 2 million pieces, using technology and practices that protect the environment at each stage of production.

Siam Sanitary Fittings Co., Ltd., manufactures and distributes faucets and fittings of highest quality under the brand COTTO using the most advanced technology and expert engineers to provide assurance that every piece consistently meets international quality standards.

An era of rapid, constant change, of unceasing technological innovation, of a wide variety of lifestyles and of seemingly limitless information results in a broad range of consumer tastes in tiles and Sanitary Ware. In response, these three companies co-create to satisfy consumer preferences for products and service in more than 60 countries around the world. These efforts have earned many awards for Sustainable Development in conformity with His Majesty the King’s pronouncements and are consistent with SCG’s policies of good corporate governance by taking into the account the impact on society from environmentally-friendly production to socially responsible activities that benefit communities, society, and youth.

Share the World … Pleasure
PROJECT REFERENCE

With appealing appearance yet full with a sense of modern designs that respond to today consumers’ lifestyles, COTTO bathtubs and shower enclosures have been chosen to showcase at several principle projects ranging from stand-alone bathtubs to whirlpool ones. With an elegant design together with a high quality aspect assuring safety, it is no doubt why several luxurious residential projects have selected COTTO products to be a part of their projects.
4 REASONS
Why Choosing COTTO Bathtub

Hygienic Bathtub
Made of high-quality acrylic, the material is embedded with hygienic substance to ensure good health and reduced stains for the ease of cleaning.

Safety
Air pressure on-off switch with safety control system for safe operation.

Service
Free installation and inspection by COTTO's bathtub system specialists.

Warranty
Maximum 5 years under normal usage conditions.
Product Specifications
COTTO’s pressurized whirlpool bathtub system

With COTTO’s complete whirlpool bathtub system incorporating air pressure to create soft water stream in all directions to help relaxing all parts of the body. The carefully selected material and inspection during every step of production ensure user’s satisfactory during every use.

1. Standard and dual jet nozzles
   - Adjustable nozzle with 360° angle and selectable water stream and direction.
   - Standard jet nozzle with 6.56 cm diameter.
   - Dual jet nozzle with 9.06 cm diameter.
   - The two-in-one characteristic of the dual jet nozzles comprised of adjustable jet stream and soft massaging jet stream only for Attina, Royal Rosana and Valencia models. Standard jet nozzles are equipped with the other models. The water stream can be adjusted by the fingertips with the standard jet nozzles.

2. Safety water drain
   - Side-mounted, the safety water drain smoothly drains water with anti-vortex system. With modern design and diameter of 8.63 cm, the drain is flattened on the tub wall to increase safety concerning residual small objects.

3. Adjustable bathtub legs
   - Adjustable bathtub legs for easy installation only equipped with pressurized whirlpool bathtub. The standard height is 11.5 cm.

4. Rear jet nozzle
   - Only equipped with Jacuzzi tubs with up to 12 air pressure points to help massaging the body and back to stimulate blood circulation.

5. Safety water drain
   - Optional for user, pressurized air jet nozzle can be installed up to 16 points to increase massaging power in the form of soft water stream at the lower part of the tub for complete relaxation.

6. Air control valve
   - Adjustable air/water mixture.

7. Air pressure on-off switch
   - Water-proof and easy-to-use with diameter of 4.68 cm.

8. Strainer cover and complete strainer set
   - Waste & overflow

9. Circuit breaker system to prevent electrical leak and short circuit
   - Earth-grounded dual electrical safety control system.
   - Automatic electrical cut-off within 1/1000 second (UL listed 220 V, 50 Hz).
   - 1 circuit breaker for 1 motor.

10. Water pump
    - Special fan-cooled motor system.
    - UL certified (UL listed 220 / 240 V, 50 Hz).
Bathtub Installation Procedure

Area preparation
- Check all equipment and joints at the bathtub to prevent leakage.
- Check all the dimensions of the bathtub to prepare the installation area.
- Plumb hot and cold water pipes above the bathtub edge 200 – 250 mm, in case when water faucets are installed on the wall (refer to the installation manual).
- Install the electrical circuit breaker and run the wall-embed electrical wire to the bathtub.
- Construct brick walls facing 3 sides of the tub while leave an opening with 400 x 600 mm. to install louvre on the side where the motor and drain is installed for ventilation and maintenance purposes. The opening should be designed so that the motor can be easily taken out.

In case the bathtub is installed against the wall, bricks should be laid with spacing so that the overflow pipe can be removed in order to perform maintenance.

Installation pattern may vary as appropriate.
NEW TERRANOVA SERIES
Stand Alone Bathtub
From the majestic look of an ocean liner to a modern design.

Recommended mixer faucet.
CT338AXS45

4 REASONS
Why Choosing COTTO Shower Enclosure

Best Quality
- High-quality materials
  - Safety tempered glass, 5 times stronger than ordinary glass
  - Grade 316 and 340 stainless materials

Smart Technology
- Easy to clean with “Hygiene Easy Glass”

Service
- Free area preparation and installation within the service areas by COTTO’s specialists

Warranty
- Maximum 5 years under normal usage conditions
Instructions for
COTTO Shower Enclosures

Instruction for Self-perform Measurement

- The width of the installment can be self-measured after finishing floor/wall tiling.

- Use tape measure to measure the width by separating the measurement into upper, middle and lower widths.

- Use the smallest width to select the size of the enclosure in order to fit the prepared area.

Operation and Maintenance Instructions for COTTO Shower Enclosures

- Wipe clean with soft cloth or bubble at least every other day (depending on the usage and ventilation frequency and properties of water and soap products being used).

- Do not apply glass cleaning agent which is basic and do not use hard cleaning materials such as synthetic fibers for dishwashing.

- Do not leave soap or shampoo stains on the floor with silicone filling for this may cause the growth of fungus (although the silicone has anti-fungus property).

- Baking soda can be used to mix with vinegar at 1:1 ratio for cleaning white stains on the mirror.
Outstandingly stylish with premium quality

Inspired by the shape of cube similar to that of safety glass’ surface, when, combined with high quality stainless materials, result in COTTO Cube Series which not only functions as bathroom partition but also enhances the bathroom’s “luxurious” look and feel.
